1. GENERAL FEATURES

The Legrand UPS Keor Multiplug model is an uninterruptible power source with line interactive technology. It delivers a rated power of 600VA and 800VA, it is CPU-controlled and is equipped, internally, with valve-regulated, hermetically sealed lead accumulator battery to guarantee a minimum backup time of 10 minutes with one typical workstation. The presence of an electronic stabilizer (AVR) inside the UPS provides the connected loads with effective protection against any interference in the electrical mains.

Keor multiplug 310081 and 310082 are equipped with: n° 4 German standard sockets with backup protection and surge protection n° 2 German standard sockets with surge protection

Keor multiplug 310083 and 310084 are equipped with: n° 4 French standard sockets with backup protection and surge protection n° 2 French standard sockets with surge protection.

The UPS is equipped with an USB charging port for mobile devices.

Keor Multiplug is managed by a microprocessor and is able to display the following alarms and operating modes through two status LEDs:

- normal operation
- battery-powered operation
- overload
- generic fault
- backup time
- end of backup time

The Keor Multiplug is CE marked and compliant with EU directives 2014/30 and 2014/35.
